The image shows a web browser window with a dark theme. The address bar displays 'localhost:8082/protected'. A 'Sign in' dialog box is overlaid on the page, with the URL 'http://localhost:8082' at the top. The dialog contains two input fields: 'Username' with the value 'kavi' and 'Password' with masked characters '***'. At the bottom of the dialog are two buttons: 'Sign in' and 'Cancel'. The browser's bookmark bar is visible below the address bar, showing links to Gmail, YouTube, Maps, Superset, LinkedIn, Telegram, and several training-related sites.

```

Update the Questions By using Put method

The screenshot displays the Postman application interface. At the top, there's a navigation bar with 'Home', 'Workspaces', and 'Explore' links, a search bar, and 'Sign In' and 'Create Account' buttons. Below this, a yellow banner indicates 'Working locally in Scratch Pad. Switch to a Workspace'. The main interface is divided into a left sidebar and a central workspace.

Left Sidebar: Contains a 'Scratch Pad' section with 'New' and 'Import' buttons. Below it are icons for 'Collections', 'APIs', 'Environments', 'Mock Servers', 'Monitors', and 'History'. The 'Collections' section is expanded, showing 'New Collection' and 'New Collection' buttons.

Central Workspace: The top bar shows the current request is a 'PUT' method to 'localhost:8082/api/questions/3'. Below this, there are tabs for 'Params', 'Authorization', 'Headers (9)', 'Body', 'Pre-request Script', 'Tests', and 'Settings'. The 'Body' tab is selected, showing a JSON body with the following content:

```
1 {
2   ...
3   "question": "org.hibernate.SessionFactory can manage contextual sessions and allows to retrieve them by",
4   "optionA": "getSession() method",
5   "optionB": "getCurrent() method",
6   "optionC": "getCurrentSession() method",
7   "optionD": "None of the above",
8   "answer": "getCurrentSession() method"
9 }
```

Below the body tab, there's a status bar showing 'Status: 200 OK', 'Time: 61 ms', and 'Size: 431 B'. There's also a 'Save Response' button. The response body is displayed in a 'Pretty' format, showing a JSON object with the following content:

```
1 {
2   "id": 3,
3   "question": "Which of the following method can be used to used to instantiate a method?",
4   "answer": "getCurrentSession() method",
5   "optionA": "getSession() method",
6   "optionC": "getCurrentSession() method",
7   "optionB": "getCurrent() method",
8   "optionD": "None of the above"
9 }
```

Here I just update the optionB for this questions
